The **HIT-4 Series**: Compensated and uncompensated liquid and gas flow computers with rate indication, dual totalizers, MODBUS communications and Data Logging.

Key features include:

- Loop or battery powered indicator with data logger.
- 20 point linearization standard.
- Configurable thru the enclosure via magnetic pointer.
- Dual Set Point Alarm output for rate or total.
- Several enclosure options are available including the explosion-proof enclosure (North America, ATEX & IEX)

The **HRT1**: Rate Indicator and Totalizer with HART® communications protocol. The unit is supplied with loop powered 4-20mA output and features:

- DC or AC power options available.
- 20 point linearization standard.
- Alarm output for rate or total.
- RS 232 Port for Configuration and Monitoring.
- Windows configuration software.
- Several enclosure options are available including the explosion-proof enclosure (North America, ATEX & IEX)

CAT SERIES

Shown in General Purpose enclosure style

- CAT-1** The CAT1 is a microprocessor controlled 2-wire 4-20mA transmitter. The CAT1 converts a low level, frequency signal from a flowmeter sensor into an analog 4-20mA output. The output is proportional to the flow rate.
- Loop powered 4-20mA.
 - 20-point linearization.
 - Windows configuration software.
- CAT-2** The CAT2 is a versatile DC or AC powered transmitter that can be interfaced with any Hoffer flow sensor. It provides a pulse output and analog signal proportional to the flow rate. The CAT2 can be configured with high and low alarms.
- DC or AC powered transmitter.
 - Pulse and analog output.
 - Optional hi and low alarms.
- CAT-3** The CAT3 is a DC or AC powered, microprocessor controlled transmitter. The CAT3 outputs a pulse scaled per unit of flow, and analog signal proportional to flow rate. The CAT3 can be configured with high and low alarms and up to 20-point linearization.
- DC or AC powered transmitter.
 - Pulse and analog output scaled per unit of measure.
 - Flowmeter linearization.
 - Optional hi and low alarms.
 - Windows configuration software.

FLOW CONDITIONERS AND CONVERTERS

PET SERIES

Shown with ELBY enclosure style

- The PET Series Converters receives frequency input and converts it to a proportional 4-20mA or 0-10V analog output. It has been designed to fit a compact "ELBY" enclosure. This series is designed for use with the Lo-Co Series of low cost flowmeter
- The PET Series Mag Preamps are designed to convert low level sinusoidal signals into stable square wave pulses. The signal conditioners are built to fit a compact "ELBY" type enclosure.

Digital to Analog Converter Mag Type	
	FEATURES
PET-1	• 0 to 10 VDC analog output
PET-3	• 4 to 20 mA analog output 3 wire
PET-7	• 4 to 20 mA analog output 2 wire with improved EMI noise immunity

Preamp Signal Conditioner Mag Type	
	FEATURES
PET-4	• TTL/CMOS (0-5 VDC)
PET-5	• 0-10 VDC Square Pulse
PET-6	• Open Collector

Nova-Flow Computers

Nova-Flow Batch Controller

Nova-Flow Energy Calculator

The Nova-Flow Series of flow computers are highly flexible, modular computers designed for your specific flow measurement needs. With more than 500,000 unique configurations possible, the potential applications for these devices are almost limitless. Below are three common configurations. For more information see our Nova-Flow Series brochure NF-XXXX. For assistance with full specification of a Nova-Flow computer for your exact application, please contact our local Hoffer Flow Controls' representative or the factory.

Volumetric or Mass Flow Computer Rate Indicator/Totalizer for Liquids and Gases

The Nova-Flow multi-channel modular flow computer.

Features:

- Up to four flow meter inputs.
- Two each temperature and pressure inputs.
- Two alarm/relay outputs.
- Two level password protection.
- Modbus Protocol.
- Temperature/Pressure/Density protocol.
- 20- Point linearization.

Volumetric or Mass Batch Controller Flow Computer for Liquids and Gases

The Nova-Batch modular flow computer for liquid and gas batch control.

Batch Controller Features:

- Two Stage Batch Control.
- One flowmeter input.
- One each temperature and pressure input.
- Local display of flow rate, accumulated total and batch total.
- Additional options available, depending on application requirements.

Volumetric or Mass Energy Calculator Flow Computer for Liquids and Gases

The Nova-Energy modular flow computer for energy measurement.

Energy Calculator Features:

- Two flowmeter inputs.
- Two each temperature and pressure inputs.
- Two alarm/relay outputs.
- Additional options available, depending on application requirements.
