Acid Injection Skid

Trident Australia's Acid Injection Skid is a purpose built system to handle your entire acid handling scope. The system comes complete with transfer pumps, downline hose, reel and a custom reservoir. Dual diaphragm pumps provide redundancy for the system and the stainless steel reservoir has mixing and aeration capabilities for product preparation. A large PPE toolbox is available and is filled to suit your needs.

This complete system is ideal for cleaning scopes such as removing marine growth with Sulfamic Acid or calcium deposits with MacDermid's Calcium Wash. The unit has been designed for both on and offshore operations, housed in a sturdy 316SS frame with forklift pockets and a drip tray with lifting certified to Marine Orders 32.

Unit Specifications

- System Working Pressure: 120 psi
- 300m downline reel with live center
- JIC 8 hose connections with suitable QD's available
- Chemical compatible hose (Terminator MSHA 2G1GC)
